

Performance you can trust

ULTRAGUARD® AF Non-silicone Antifoam

ULTRAGUARD® AF is a non-silicone antifoam designed for the treatment of all types of water mix metal working fluids. It contains a blend of high molecular weight polyglycol derivatives and water.

Features

- Effectively controls excessive foaming.
- Economic in use - high dilution.
- Suitable for all types of water mix metalworking fluids.
- Silicone free.

Directions for Use

Add 1 part ULTRAGUARD® AF to 10000 parts of the fluid which requires de-foaming. The antifoam should be added to about 10 litres of emulsion and thoroughly stirred before adding to the machine sump.

Alternatively it may be added directly to the sump, provided there is sufficient agitation to disperse the Antifoam.

Should the foam persist, a second dose may be added.
