

Technical Data Sheet

Indu-Tek Red Star EP 2

A Premium quality general purpose, extreme pressure, tacky grease for mining and industrial applications

Indu-Tek Red Star EP 2 is a premium quality, lithium complex grease for lubricating all bearing types, even in arduous conditions; it is designed to increase lubrication intervals over wide operating temperatures. **Indu-Tek Red Star EP 2** is extremely adhesive and will stick to the lubricated components, extending the life of the component.

Applications: -

Mining: General lubrication points on draglines and shovels, all bearing types, conveyors, shakers and crushers. Most heavy duty, high wear applications.

Industrial: All anti-friction and plain bearings, general machinery lubrication points, fifth wheels and other heavy duty applications.

Features and Benefits: -

- | | |
|------------------------------------|--|
| ➤ High load carrying capability | Protects surfaces from wear especially in high load applications, extending component life |
| ➤ Exceptional mechanical stability | Extends lubricant life and relubrication intervals |
| ➤ Corrosion resistant | Extends component life in wet conditions |
| ➤ Good oxidation stability | Ensures long lubricant life at higher temperatures |

Method of Application: -

Indu-Tek Red Star EP 2 can be applied by hand, or by using a standard grease gun, or via a central lubricating system designed for and capable of pumping a NLGI No.2 grease.

As with all greases used for the first time, check compatibility with the grease applied previously and if necessary purge bearings prior to application.

Part Number: 11008
