

Technical Data Sheet

Indu-Tek Permian WR Chain Oil

A premium quality, highly adhesive, waterproof, anti-fling, wear resistant Chain Lubricant for industrial, automotive and mining applications

Permian WR Chain Oil is a premium quality, mineral oil based chain lubricant for all chain types in a wet or aggressive environment. The special blend of base gives an excellent adhesion to the substrate ensuring outstanding resistance to water wash off in saturated and aggressive environments. It also has superb non drip and anti-fling characteristics, ensuring the chain stays lubricated in all conditions. **Permian WR Chain Oil** is a non Newtonian lubricant, and has very good resistance to heat, remaining very stable up to 160°C.

Applications: -

All chain types, conveyor systems, especially washer lines, water and utilities industries, steel industry and salt water applications.

Features and Benefits: -

- | | |
|----------------------------------|--|
| ➤ Extremely water resistant | Protects and prolongs chain life |
| ➤ Excellent adhesion | Will not fling off, lowers lubricant usage |
| ➤ Excellent corrosion resistance | Extends chain life |
| ➤ Wear resistant | Increases life of chain |

Method of Application: -

Permian WR Chain Oil can be dipped, or applied manually by brush or with an oil can. It can also be applied automatically by spray or drip feed as per the equipment manufacturers' instructions.

Part Number: 21002
