

Technical Data Sheet

Indu-Tek Weld-Pro BN

A powerful, fast drying, ceramic coating spray to protect welding equipment and consumables

Weld-Pro BN is a premium quality ceramic coating spray designed to preserve and protect welding equipment and consumables against damage caused by weld spatter. **Weld-Pro BN** is exceptionally fast drying, long lasting and extremely durable. It will increase productivity whilst considerably increasing the life of welding equipment, jig and fittings as well as the components being manufactured

Applications: -

Protection of Shrouds, welding nozzles and contact tips, jigs, fixtures and fittings, work pieces, etc

Features and Benefits: -

- | | |
|----------------------------------|-------------------------|
| ➤ Greatly increases welding time | Improved productivity. |
| ➤ Fast drying | Saves time |
| ➤ Excellent adhesion | Consumables last longer |
| ➤ Ceramic protective coating | Reduced cleaning time |
| ➤ Low daily cost | Increases profitability |
| ➤ Protects work pieces | Increases productivity |
| ➤ Protects tips and nozzles | Lowers production costs |
| ➤ Keeps shroud clean | Higher quality weld |

Method of Application: -

For best results, surface should be clean, dry and free of dirt, oil and grease.

Shake can thoroughly before use. Hold can upright and apply a thin even coating onto surface from approx 15 - 30cm (6 to 12 inches). Coating dries and equipment is ready to use in a few seconds.

Part Number: 61010
